

Para instalar Applio v3 en mac Requisitos

- 1- Descargar Xcode <https://apps.apple.com/us/app/xcode/id497799835?l=es-MX&mt=12>
- 2- Descargar Python 3.9.8 <https://www.python.org/downloads/release/python-398/>
- 3 - Descargar Applio <https://github.com/IAHispano/Apllio>

Si ya tienes todo instalando correctamente

pone esto la terminal de mac `python3 -m venv .venv source .venv/bin/activate`

```
Last login: Tue Jan 30 00:37:36 on ttys012
anthony@Anthonys-Air ~ % python3 -m venv .venv
[source .venv/bin/activate
(.venv) anthony@Anthonys-Air ~ %
```

despues de hacer eso en tu terminal pone `cd` y en repositorio de Applio

```
Last login: Tue Jan 30 00:37:36 on ttys012
anthony@Anthonys-Air ~ % python3 -m venv .venv
[source .venv/bin/activate
$[(.venv) anthony@Anthonys-Air ~ % cd /Users/anthony/Downloads/Apllio-3.0.4
```

Ahora pone esto tu terminal run-install.sh y se van instalar todo lo necesario para applio

```
Applio-3.0.4 — Installer — Python < sh run-install.sh — 80x24

DEPRECATION: omegaconf 2.0.6 has a non-standard dependency specifier PyYAML>=5.1
.*. pip 24.0 will enforce this behaviour change. A possible replacement is to up
grade to a newer version of omegaconf or contact the author to suggest that they
release a version with a conforming dependency specifiers. Discussion can be fo
und at https://github.com/pya/pip/issues/12063
Installing collected packages: torch, torchvision
```

Cuando termine en proceso de instalacion

```
Applio-3.0.4 — Installer — -zsh — 129x24
Applio has been successfully downloaded. Run the file run-applio.sh to run the web interface!
(.venv) anthony@Anthony's-Air Applio-3.0.4 %
```

Luego pone run-applio.sh Y se van descargar algunas cosas y solo espera y se abre applio automáticamente
